

Course Reviews from Administration

This course was one of the most powerful reading courses I have ever taken. I have a solid understanding of how the components of reading come together. I also learned all of the syllable patterns and rules for spelling/sounds. The brain research shared helped me to understand why students may struggle. I have been able to use this knowledge with teachers. I am excited to have my whole staff trained with this information.

This course is not only an eye opener to what children need in order to be able to learn, but it walks you through the process of how to teach reading. I have told everyone I know that this course is a must.

Course Reviews from Instructional Coaches

All I can say is, don't think about it, do it. This was the best training we have ever been asked to complete. It was timely, informative, and provided us the resources and materials needed to immediately try the new learning. My teachers are on fire right now and I have to give this credit to Casey's approach to these instructional strategies. It makes sense!

I feel so much more informed on the steps, process, and overall understanding of the multisensory approach to reading instruction. I also feel much more prepared to implement these strategies and practices with students this school year after participating in this course. The course was a good balance of learning the concepts of this approach to reading instruction, practicing the strategies and practices, and then assessing your learning throughout the course.

Thank you for the comprehensive training! Every bit was helpful and so impactful for me as a literacy coach.

Savannah Dyslexia's multisensory training was so engaging and applicable. It merged together theory and application in a way that made me immediately want to start doing this with my students!

Thank you for such an educational and fun opportunity to learn new skills. I felt like this course taught me more than a whole semester's worth of the things I learned in this one ELA course I took in graduate school.

Course Reviews from Teachers

I would highly recommend taking the OG Multi-sensory Course. I think it should be a required course for all elementary school teachers. The content is presented in a concise and structured format with excellent strategies and examples to use in teaching our students to be strong readers and writers. I am so thankful I was given the opportunity to do this! I thoroughly enjoyed it, and I know my students will greatly benefit from the instructional techniques.

Savannah Dyslexia's Multisensory Learning course has been the most useful professional development that I've done since graduating. Take your time and soak up the knowledge. It will improve your teaching and impact student learning.

This course has changed my view of literacy instruction. I've loved all the resources and hands-on experience it provides. Would recommend to anyone wanting to learn more about how to implement structured literacy in the classroom in a fun and engaging way!

Having taught intensive phonics for over 40 years, this course has been invaluable to fill in the gaps of my understanding of why we do what we do in the English language. Casey is knowledgeable and can easily help teachers of all ages to get good at teaching decoding skills to children. What a joy it was to take a course that helps me be a better teacher. Thank you so much for giving me the reasons why and how to immediately implement.

I have enjoyed this course more than any other training because I left with 100% right now strategies I can use with my students. I feel like I have a toolbox full of tools to use that will start helping all my students. This isn't a training for one group of students, this training will help you learn how to reach all students.

I call myself lucky to have been selected to take this course. It has taught me more than I had anticipated and learned so much needed instructions that I never thought I needed. I am very thankful and so are my students. Again, you are the best. Thanks.

I have LOVED this course so much and suggest it to all my teachers who want to know the why and how for reading instruction. I can take the resources and what I learn from Casey in the videos and apply it to my classroom immediately! I feel so much more confidence in my phonics instruction. I teach a small group special education classroom and just being able to teach them how to code CVC words has helped them master their goals! It gave them the confidence as well. This has been the BEST professional development opportunity I have had in my 11 years of teaching.

I absolutely enjoyed this course, and I am walking away a more knowledgeable teacher than I was prior to taking this course. I have been able to implement many of the strategies during our skills block segment and the students really seem to enjoy it. I would highly recommend this course to anyone looking to deepen their knowledge on how to teach phonics and vocabulary skills using a multi-sensory approach.

The Savannah Dyslexia Course is an engaging and insightful course that breaks down important reading concepts and strategies that can (and should) be implemented in the classroom. I am beyond pleased with the knowledge I've acquired that can help to guide my students in literacy and more. Needless to say, I highly recommend this course!

This course has allowed me to understand reading instruction to a whole new level. The videos are easy to follow, carry a lot of relevant, in time information that can be used right away in the classroom. Finally, the live session was a great way to clarify misconceptions as well as to dig deeper into the learning.

This course provided excellent instruction in Orton Gillingham theory, techniques, and strategies. The instructor demonstrated the teaching strategies and also used videos of actual lessons to help show how to implement the strategies. I'm excited as I utilize what I've been learning with my students, and I can see progress already! Great course!

This course was great. It was taught by an instructor who is clearly passionate about reading instruction and most importantly someone who is an expert in the field. I feel confident I will be able to implement all that I have learned in this course. My students will shine brighter because of it. I wish I would've learned these things years ago!

This course was one of the best Professional learning courses that I have taken despite being 90% online. The videos were very thorough and allowed me to see the learning and teaching.
