

Introduction to Implementing Multisensory Structured Literacy

Cohort Design

Each cohort is designed to give trainees access to all 8 online modules for 12 weeks leading up to a Live 6-hour Zoom training day with course developer, Casey Welsh, Fellow/OGA. Trainees must complete all 9 online modules (39 hours) before attending their Live Training day. You may complete these modules at your own pace leading up to the Live day. To help plan out your training hours, a suggested pacing guide follows.

When you choose a cohort to register for, you will also choose which of the Live Zoom training dates best suits your schedule.

For school-wide and district-wide training, customized Live Training days can be scheduled.
